Remarks

Note
 Conclusions are not to be drawn that there are no other hazards or unsafe conditions. Also we do not imply that all Federal, State or other political subdivision Safety Standards and/ or Regulations have been met. Furthermore, we cannot assume any responsibility or legal liability from misinformation given our representative or for any consequential damages resulting from inaccuracies, human error or delays, for whatever reason in reporting unusual conditions to you.
 Report made from observation and interview and concerns such conditions and practices as were observed and considered at the time of call. It is not intended to indicate that there are no other exposures. We do not assume a legal liability due to misinformation given by the inspector, nor inaccuracies or human error. Answers to questions and narrative remarks based only on statements of informants available at time of inquiry and not on public records, searches, verifications, etc., unless where specifically otherwise stated in answers or remarks.

Guidelines & Tables

❑ Walls & Ceilings

Table 1 shows NFPA-recommended clearance between wood stoves and protected and unprotected combustible walls and ceilings. Figure 1 illustrates these clearances and shows how protection is installed.

Walls & Ceilings Table 1

	<u>Combustible surface covering</u>	<u>As wall protector</u>	<u>As ceiling protector</u>
<input type="checkbox"/>	3-1/2-inch thick masonry wall without ventilated air space	24 inches	
<input type="checkbox"/>	1/2-inch thick non-combustible insulation board over 1-inch glass fiber or mineral wool batts without ventilated air space	18 inches	24 inches
<input type="checkbox"/>	24-gauge sheet metal over 1-inch glass fiber or mineral wool batts reinforced with wire or equivalent, on rear face with 1 inch ventilated air space	12 inches	18 inches
<input type="checkbox"/>	3-1/2-inch thick masonry wall with 1 inch ventilated air space	12 inches	
<input type="checkbox"/>	24-gauge sheet metal with 1 inch ventilated air space	12 inches	18 inches
<input type="checkbox"/>	1/2-inch thick non-combustible insulation board with 1 inch ventilated air space	12 inches	18 inches
<input type="checkbox"/>	1-inch glass fiber or mineral wool batts sandwiched between two sheets of 24-gauge sheet metal with 1 inch ventilated air space	12 inches	18 inches
